|---|---|---|---|
| **Document ID** | PP-DOC-001 | **Version** | 1.0 (proposed) |
| **Prepared** | 19 October 2026 | **Document owner** | Documentation & Compliance Coordinator |
| **Approval** | Owner approval | **Next review** | 19 October 2027 (proposed) |

## Purpose and control rules

• This is the central register for controlled policies, SOPs, plans, forms and organizational documents prepared for the Pixel Palace launch assignment.

• Codes, version numbers, preparation dates and review dates shown as proposed are administrative placeholders. Confirm the actual first-issue date, approver, effective date and status before formal use.

• The CEO reviews policies and SOPs; the Owner approves them. The Documentation & Compliance Coordinator maintains the master register, controlled copies, revision history and distribution list.

• Review each controlled document every 12 months, after a significant incident or material business change. Record superseded versions as “Superseded”; do not silently overwrite approved records.

• Draft/proposed does not mean approved. Use “Pending approval” until signed off; use “Active” only after approval and communication to affected staff.

## Master register

Prepared/compiled: 19 October 2026. For documents completed earlier in the assignment, the exact original creation date was not available in the working record; therefore the date below is recorded as “Confirm” rather than assumed. Proposed next-review dates are 12 months after the confirmed issue date.

## Recommended document naming convention

Pixel_Palace_[Short_Title]_[Document_ID]_v[Major.Minor].pdf | Example: Pixel_Palace_Security_Measures_SOP_PP-SOP-002_v1.0.pdf

Revision rules: major version (2.0) for substantial changes to responsibilities, controls or process; minor version (1.1) for clarifications or low-impact edits. Every revision requires review, approval as applicable, updated register entry and controlled redistribution.

**Important: do not represent any document as approved until the Owner has formally approved it. Validate local legal, safety, privacy, employment, tax and other regulatory requirements before implementation.**
